### Objective and Features of the Fund

## 1. Objective of the Fund

The Fund aims at investment performance linked to the Nomura Enterprise Value Allocation Index\* (Benchmark Index), which means NAV volatility is to correspond with that of the Benchmark Index.

\*\* The Nomura Enterprise Value Allocation Index is comprised of selected common stocks listed on the Japanese stock exchanges, selected by using quantitative indicators based on factors such as profits, dividends, personnel expenses, capex, and R&D expenditure. The Nomura Enterprise Value Allocation Index is calculated with a base date set as August 17, 2001, and it assumes the index value on that date to be 10000.

#### 2. Features of the Fund

- Main subject of investment
  - -Stocks listed on Japanese stock exchanges that are included or are due to be included in the Benchmark Index are to be invested in the Fund.

### ■ Investment Policy

- (i) The Fund is investing only in stocks that are included or are due to be included in the Benchmark Index. The goal of the Fund is to be managed so that the proportion of the individual stocks in the trust assets are held in a proportion that corresponds to the proportion of these individual stocks in the Benchmark Index, calculated based on the calculation rules of the Benchmark Index, and the Fund aims at investment performance linked to the Benchmark Index.
- (ii) The Management Company may issue investment instructions to adjust the component of the trust assets to meet policy (i) above:
- If the calculation method of the Benchmark Index is changed or announced to be changed;
- -If adjustments to the component proportion of individual stocks included in the Benchmark Index are made or announced to be made due to causes such as interchanges in the selected stocks in the Benchmark Index, changes in capital in any of the selected stocks in the Benchmark index, or other similar events;
- -If an addition or exchange of this trust is made; or
- -In other cases, if necessary to ensure linkage to the Benchmark Index.
- (iii) Stocks that are indicated to be invested are stocks which are listed (or due to be listed) in the financial instrument exchange or registered (or due to be registered) in the Registry of Over-the-Counter Traded Securities and which are issued by the issuing corporations whose issued stocks are included or are due to be included in the Benchmark Index. However, this indication is not necessary for stocks that are acquired through allotments to stockholders.

The stocks which are excluded from the Benchmark Index shall be sold promptly, taking market conditions into consideration, though the stocks may in certain cases not be sold promptly because of the liquidity, etc., of the stocks.

(iv) Notwithstanding provision (i) above, the Fund may make complementary purchases of stock index futures connected with the Benchmark Index or other Japanese stock indexes to keep the performance tracked to the Benchmark Index.

Management described above may not be achieved depending on funding trends, market trends, etc.

### ■ Copyright, etc., of the Nomura Enterprise Value Allocation Index

The Nomura Enterprise Value Allocation Index is released by Nomura Securities Co., Ltd., and property rights to the Nomura Enterprise Value Allocation Index belong to Nomura Securities Co., Ltd. Nomura Securities Co., Ltd. does not guarantee the accuracy, completeness, reliability, usefulness, marketability, merchantability, or fitness of the Nomura Enterprise Value Allocation Index, and is not responsible for the performance of this ETF that uses the Nomura Enterprise Value Allocation Index.

#### ■ Investment Restrictions

Investment ratio in stocks	There is no restriction on the investment ratio in
	stocks.
Investment ratio in assets	The investment ratio in assets denominated in
denominated in foreign currencies	foreign currencies shall not exceed 20 % of the net
	asset value of the trust assets.
Use of derivatives	Use of derivatives is allowed (i) until the Fund
	begins investing in stocks in accordance with the
	investment policy, or (ii) for purposes of managing
	investment performance linked to the Benchmark
	Index. In such cases, the Fund may
	complementarily purchase stock index futures
	connected with the Benchmark Index or other
	Japanese stock indexes.

### Distribution Policy

- -Dividends are distributed on the 20th of April and 20th of October of each year.
- -As a general rule, the full amount of dividends and other income arising from the trust assets are distributed after deduction of expenses. However, the amount of dividends that are payable may in some circumstances amount to zero. Even if any profits are realized from the sale and purchase of individual stocks, no dividends shall be paid.

#### Investment Risks

1. Factors that contribute to NAV volatility

The NAV of the Fund is subject to fluctuations in the prices of the securities, etc., in which the Fund invests. All profits and losses arising from fund management are borne by the investors. Any principal invested in the Fund by investors is therefore not guaranteed. Investors may incur a loss and the value of their investment principal may fall below par as the result of a decline in the NAV. The investment trust differs from a savings deposit.

Stock Price Fluctuation Risk	NAV of the Fund may be influenced by stock price fluctuations
	since the Fund invests in stocks.

<sup>\*</sup> The factors that contribute to fluctuations in the NAV are not limited to those mentioned above.

<< Primary Factors for Discrepancies between the Benchmark Index and NAV>>

The fund aims at an investment performance for NAV volatility linked to that of the Benchmark Index; however, in managing the investment assets, we cannot guarantee that movements will be identical to those of the Benchmark Index primarily for the following reasons:

- (i) We cannot make individual stocks' incorporated ratio in the Fund completely the same as the component proportion of component stocks in the Benchmark Index.
- (ii) The Fund may incur market impact or bear costs such as brokerage commission, etc., by the trading of individual stocks, such as when portfolio adjustments are made due to changes of the component stocks in the Benchmark Index, changes in capital in any individual stocks in the Benchmark Index, partial exchanges of actual stocks or any other causes.
- (iii) When cash remains as part of the trust assets as a result of additional issue partly made by cash, dividends obtained from individual incorporated stocks, or rights handling, etc.
- (iv) There may be a price spread between the sale price and the appraised value of the object stocks.
- (v) When futures transactions are made, there may be a disparity between the prices of the forwards and the Benchmark Index.
- (vi) The Fund bears certain costs, such as trust fees.
- \* The factors that contribute to the discrepancy between the Benchmark Index and NAV are not limited to those listed above.

#### 2. Additional Considerations

The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called "cooling off") are not applicable to subscriptions to the Fund.

- In the event that a large number of redemptions occur and it becomes necessary to raise funds for the large number of redemptions within a short period of time or in the event that a sudden change in the market environment in the primary trading market occurs etc., there is a risk that the Fund may not be able to trade at an expected price (based on prevailing market prices) or the trading volume may be limited due to a temporary decline in the liquidity of the assets incorporated in the Fund. As a result of these risks, there is the possibility that the net asset value will be negatively affected, that acceptance of applications for redemption will be cancelled, or that the payment of redemption proceeds will be delayed.
- Management based upon the investment policy may not be achieved depending on funding trends, market trends, etc., or unexpected circumstances.
- The interest/liquidation payment from the issuers of the securities which are incorporated into the Fund may be delayed.
- Transactions pertaining to the Fund, such as an investment in securities and contracts related to such fund, may default because of the bankruptcy, or other similar event, occurring to a counterparty.
- NAV of the Fund and the Benchmark Index may differ because of costs and other factors. It is not guaranteed that the Fund's investment performance will track or exceed the Benchmark Index.
- The market price of the Fund is based upon supply and demand, as calculated through competitive buying and selling on the exchange. Therefore, market price may differ from the NAV itself.
- Please be aware that the Fund will be delisted and the trust will be terminated if the number of units of beneficial interests is below 100,000 for 20 successive business days.

## 3. Risk Management System

The Management Company examines Fund performance and oversees management risks by having established a committee to take charge of these matters.

- Examination of the Fund performance
  - The committee reports and deliberates on the results of periodic examinations (analysis/evaluation) of the investment trust's trust asset performance results.
- Administration of management risk
  - The committee identifies and manages management risk and, based on its findings, provides guidance to the appropriate divisional management and any other relevant

sections regarding rectification measures for appropriate administration.

\*\*Administration of Liquidity Risk

The committee establishes rules for the administration of liquidity risk, monitors the liquidity risk of assets incorporated in the Fund, and formulates/verifies emergency measures. The committee oversees the appropriate implementation of liquidity risk administration and oversees the liquidity risk administration system.
